How to choose the best scanner?

Environment

The environment a customer operates in is important for optimal scanner selection.

- In light industrial environments, offer the Xenon 1950H-HD, 1952H-HD or Voyager 1470G2D
- In heavy industry environments, the Xenon 1950G or Xenon 1952G are recommended
- In pharmaceutical or medical industries, the Xenon 1950H and Xenon 1952H are recommended

Wireless or Wired

- For wired scanning: Voyager 1470G2D or Xenon 1950(G/H)
- For wireless scanning: Xenon 1952(G/H). This scanner communicates via Bluetooth with a base (supplied with the scanner) that is connected to a computer.

High density barcodes?

The Voyager 1470G2D is delivered in a standard density version, while the Xenon 1950 series scanners are always delivered in high density versions. High density scanners, like the Xenon 1950, can read barcodes with a higher density that can capture more data in the same space.

Barcode readers range

Honeywell Xenon 1950G HD handheld scanner

The Xenon 1950G HD scanner delivers superior barcode scanning and digital image capture. The scanner incorporates a revolutionary decoding architecture and a custom sensor, enabling extended depth of field, faster reading and improved scanning performance on poor-quality barcodes. From high-density linear to 2D barcodes found directly on the screen of a mobile device, the 1950G HD scanner decodes virtually all barcodes with ease.

Honeywell Voyager 1470G 2D handheld scanner

Optimised for fast scanning of linear bar codes, including poorly printed and damaged codes, the Voyager 1470G 2D enables enterprises to minimise manual data entry, leading to increased productivity and reduction in errors.

Honeywell Xenon 1952G HD bluetooth scanner

The wireless area-imaging scanner Xenon 1952G HD delivers superior bar code scanning and digital image capture. Xenon 1952G HD incorporates a revolutionary decoding architecture and a custom sensor, enabling extended depth of field, faster reading, and improved scanning performance on poor quality bar codes. From high density linear to 2D bar codes found directly on the screen of a mobile device, Xenon 1952G HD decodes virtually all bar codes with ease. Xenon 1952G HD incorporates a Bluetooth Class 2, v2.1 radio, enabling unrestricted movement up to 10m from the base, and a battery that provides up to 14 hours of battery life. For added convenience, a paging system helps locate misplaced scanners.
