

Product Memo – CR3600 introduction

CR3600 Barcode Reader

The Code Reader™ 3600 (CR3600) is the latest addition to our advanced product line of barcode readers. This sleek, wireless scanner has a colour screen and keypad that allows users to manually enter data in real time. The screen provides a mobile solution for users who need instant visibility of scanned information—from detailed inventory applications to complete traceability management, the device handles every type of mobile barcode need.

Features and benefits

The CR3600 comes equipped with the following features and benefits:

- Lightweight, ergonomic models in palm and hand-held configurations
- Bright colour display screen
- Durable, quick release rechargeable battery cartridges
- Battery status LED indicators with fuel gauge
- User feedback with vibration, audible tones and LED
- High speed, omnidirectional reading of 1D, 2D and stacked barcodes
- Multiple programmable buttons for customised work flow processes
- IP54 housing securely protects electronics and optics
- Paging button assists in reader location (charging station with embedded CodeXML® modem option only)
- Reads barcodes on mobile devices
- Powerful data management capability with JavaScript
- Compatible with Bluetooth supported Android, iOS, and Windows mobile devices and tablets

Product Memo – CR3600 introduction

The CR3600 embodies a world class decoding platform with superior barcode reading performance of all 1D, 2D and stacked barcode symbologies.

Another asset of the CR3600 is that it has the ability to take on more than one workflow operation at a time. A variety of applications can be created and loaded onto the reader and can be accessed with a simple touch of a button. With a single scan of a barcode, users can also direct the same data set to multiple applications. These features streamline workflow processes and ultimately lower costs by reducing the need to rely on numerous scanning devices.

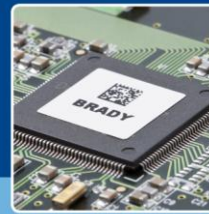

The CR3600 scanner packages are a ready to use, complete solution. The all-inclusive kits include reader, battery and charging station with embedded CodeXML® M3 Bluetooth modem. This makes that the CR3600 is ready to use immediately for the desired application.

This CR3600 is replacing the current CR3500 models.

Target markets/users and applications

The CR3600 is ideal in the following applications:

- Traceability in manufacturing
- Sample tracking in Lab
- Work-in-Process tracking
- Logistics/warehousing

Positioning overview

With the introduction of the CR3600, this is our current CR barcode reader line-up in overview:

Characteristics	CR1400 	CR2600 	CR3600 
Reads 1D and 2D barcodes	•	•	•
Anti-glare illumination technology	•	•	•
Palm or hand-held configurations		•	•
Audible tone and LED 'good read' feedback	•	•	•
Vibrating 'good read' feedback	•	•	•
Dual field optics (wide & high-density fields)	•	•	•
Disinfectant ready plastics	•	•	
Battery fuel gauge		•	•
Walk-away prevention features		•	•
Wireless via Bluetooth®		•	•
Wired via RS232 or USB connection	•		
IP Rating*	IP54	IP65	IP54

*IP rating: Ingress Protection Rating, classifies and rates the degree of protection provided against the intrusion of solid objects, dust, accidental contact, and water in mechanical casings and with electrical enclosures. The higher the rating, the better the protection.

Part numbers

Article number	Product description
138472	CR3600, Handle, Dark Grey, Bluetooth, Battery, Charging Station with Embedded Modem & USB Charge Cable
138473	CR3600, Palm, Dark Grey, Bluetooth, Battery, Charging Station with Embedded Modem & USB Charge Cable
138474	CR3600 Charging Station with Embedded Modem and 3' USB Charge cable
138475	B4 Dark Grey Battery
